

1. Why is the FCC interfering with the NJ 'do not call' law? States have the right to pass laws different from Federal law or law of other states.
2. We need MORE stringent 'do not call list' laws, not LESS stringent. Hopefully, MN will enact stronger laws in these matters.
3. I will have to have a phone listed in my name next month for the first time in a while, and am really bummed about it, because it means my name and number will be on the record and, if i'm not careful, I'll start getting tons of telemarketing calls. I can't give up 'caller ID' for this reason... when the # comes through as 'unavailable', that means I'M 'unavailable'!
